Be Secure Feel Secure at Cities Forum 2023: Learning from the Experts

The Be Secure Feel Secure team is thrilled to have participated in one of the largest events that brought together over 750 representatives from EU cities and EU regions.

Combating insecurity among citizens with a gender-based approach

In recent years, a gendered perspective has become increasingly present in discussions of urban security. Efus' Women in Cities Initiative (WICI) and the BSFS project partners organised a panel discussion and exploratory walk hosted by the City of Les Lilas (France). These activities opened up discussions about the importance of a gender-based approach to urban security policies and the design of public spaces in cities.

Fact Sheets

The **EU-funded Be Secure Feel Secure (BSFS)** project is an **excellent example of how urban security can be co-produced** by involving different stakeholders in a participatory approach. The project involved local authorities, citizens, and other stakeholders, who collaborated to co-produce efficient solutions to urban security issues.

The project provided tailored and evidence-based policies to address security-related challenges in the local context, including a baseline assessment, the creation of a Local Council for Crime Prevention, the CURiM platform and a Victim Support Unit.

These mechanisms and tools provide the local stakeholders with up-to-date knowledge of the local reality concerning crime and insecurity. These

interventions, coupled with social and spatial interventions, contributed to improving the quality of life and to making Piraeus a safer and more secure city.
